

Overview of the Improvement Facilitator Community of Practice (CoP)

The purpose of this CoP is to provide support for facilitators, to share ideas and techniques for practice facilitation related to quality improvement and to celebrate successes. Members will have a common goal within the community and experience:

- Sharing of leading practices, challenges, identification of opportunities and lessons learned
- Resource discovery
- Learning and cooperation

- Mentoring
- Personal and professional development

It is the links between members that will give this community its force. Exchanges between members and cohorts are the key to ensuring speedy and efficient exchange of “know how”.

Supporting the Improvement Facilitator

Each Improvement Facilitator is supported by a designated TOP Clinical Process Advisor who will be available for one on one support. Improvement facilitators that train together will be considered a cohort. Webinars are scheduled for all cohorts to have shared learning around topics that are fundamental to their work, currently the offerings are focused around the various EMRs. Improvement Facilitators and one extra resource per improvement facilitator are invited to join, at the cost of TOP, the Institute for Healthcare Improvement Open School a quality improvement on-line educational community. TOP will also be the link for EMR resources related to screening and prevention. Improvement facilitators are invited to participate in the private on-line community on Yammer, an on-line discussion and sharing forum.
