

Creating Run Charts with Percentages

Provider: _____

Title: _____

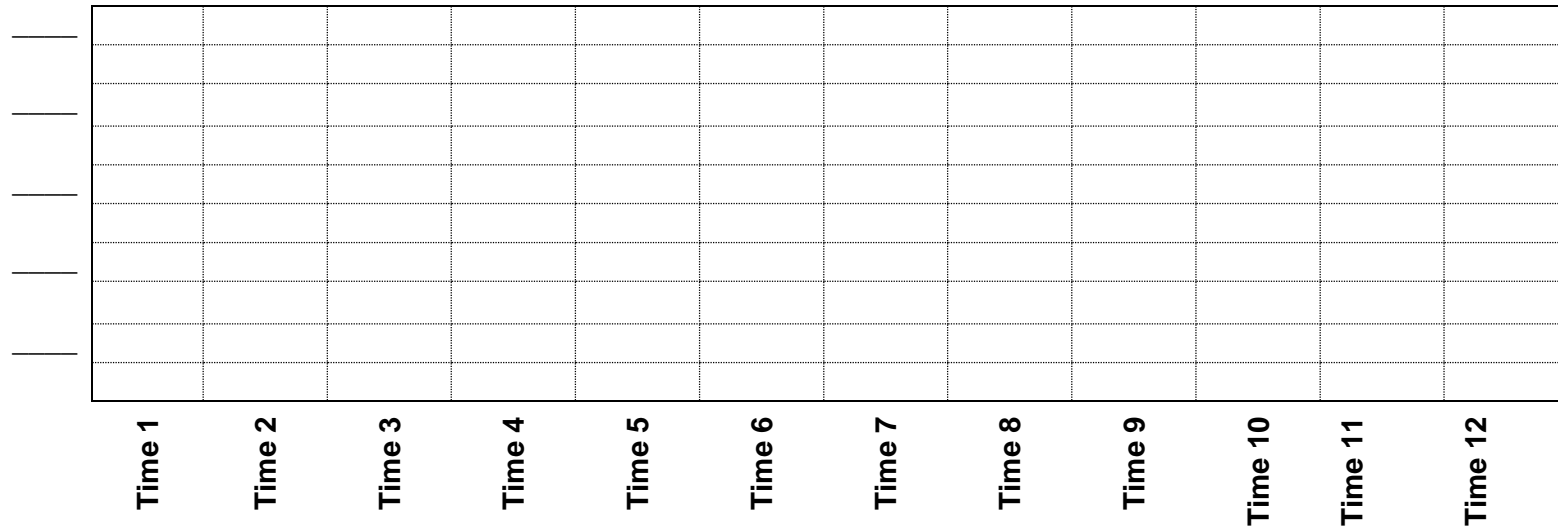

- Display of data points plotted in chronological order
- The horizontal x-axis shows regular consecutive increments of time
- The vertical y-axis shows amount or volume of what is being measured/plotted
- A centre line, median, is included for use in identifying types of variation once data has been plotted
- Should have at least 11 data points, 15-25 is preferred
